## Admiral Sims Takes Issue With the British Admiral

In May issue of Current History Magazine, the periodical published monthly by The New York Times Company, two articles appear which will excite wide interest throughout the world.

One is by Lord Wemys, Admiral of the British Fleet, and the other is by Admiral Sims of our own navy. Admiral Sims answers the article of the British Admiral in which the reduction of the Navies is the topic and he holds quite a different point of view. Both articles are of great value and interest.

The leader of the Anti-Saloon Forces has an article in the same issue in which he reviews the results of Prohibition with an imposing array of statistics.

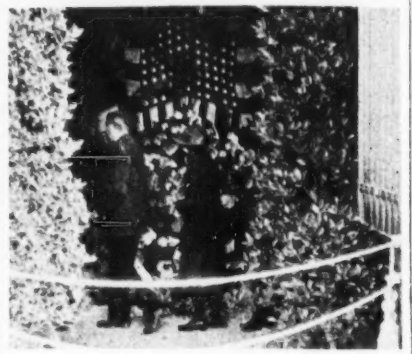

There are 40 other articles of interest. All nations are represented. 192 pages illustrated; 25c per copy. \$3.00 per year.

## BURIAL OF THE UNKNOWN SOLDIER; THE WASHINGTON ARMS CONFERENCE.

THESE imposing episodes have been perpetuated in beautiful rotogravure etchings which appeared originally in *Mid-Week Pictorial*, the weekly illustrated magazine published by The New York Times Company.

The edition of the issue in which the pictures appeared was quickly sold out. A few copies were reserved and these have been bound into a Portfolio consisting of four issues of the Pictorial.

With the pictures of the burial of the Unknown Soldier are etchings illustrating the opening sessions and chief personages of THE WASHINGTON ARMS CONFERENCE. The Portfolio is encased in a stiff board cover.

Anyone who now subscribes for the *Mid-Week Pictorial* by forwarding the attached coupon will receive the Portfolio FREE OF ALL COST.

Mid-Week Pictorial is a weekly magazine of 24 or more pages, printed in rotogravure, containing 75 to 100 etchings of the important news happenings of the week in all parts of the globe, supplemented by pictures covering the latest developments in the fields of Art, Drama, Science, Sports, and Politics. The subscription price is \$5.00 a year, post paid.

## Marshal Joffre Reviewing New York Veterans

THE greeting of New York to Marshal Joffre, the victor of the first battle of the Marne, was quite as hearty and enthusiastic as that with which the sturdy old soldier has been welcomed in

other American cities as he journeyed from coast to coast. The freedom of the city was conferred upon him by Mayor Hylan, and his time has been taken up with numerous fetes and receptions organized in his honor. Perhaps the

event that gave him the greatest satisfaction and kindled in him an afterglow of the war was his review of the veterans of the provisional brigade of the Twenty-seventh Division, when he again saw the sun glinting on the helmets

of the men who helped to smash the Hindenburg Line. His face lost its strained look and he whipped his hand to the brim of his gold-laced red cap in salute as the infantry, artillery and cavalry marched past.

THE Abdin Palace, in which is seen the King of Egypt, covers twelve acres of ground and is one succession of great rooms and stately corridors. The conservatory has many vari-colored singing birds which flit around among the palms.—It has been

determined by the Government that no more of the American dead shall be officially brought home. They will sleep their last sleep in the beautiful cemeteries of France.—Of interest to all lovers of religious liberty is the memorial to be erected to Roger Williams, the stalwart preacher who when driven out of his province by relig-

to all soldiers and sailors of the late war who are in need of hospital treatment.—Mrs. Harding is Honorary President of the Girl Scouts of America and keenly interested in the organization.—The Genoa Conference has several times been on the verge of failure and its future is problematical.

GREAT political and commercial importance was attached in France to President Millerand's tour of the African Colonies, beginning April 6 and scheduled to last about a month. Starting from Marakech, Morocco, with a large party, the plan was to make most of the journey by automobiles, visiting Rabat, Fez and Oudja, in Morocco, and then proceeding to Algeria and Tunis. The double purpose of the tour was to pay France's tribute to the Moroccan and Algerian soldiers who fought in the French ranks in the World War and to encourage the development of the projects France is starting all over her African colonies. These include construction, improved ports, new railroad lines and a great road system which will aid the development of agriculture and mining. French colonial work is characterized by the policy of making every native consider himself a Frenchman, whatever be his complexion or religion, and giving him representation in the French Chamber of Deputies. The attitude of the French people toward these colonials is expressed in General Mangin's phrase: "France is a country of 100,000,000 people."

They had made three legs of their journey and were 900 miles from their destination when the mishap occurred.—That Japan is justifying her claim to rank with the most modern of nations is shown by the great exposition which she is preparing for this year at Tokio. No expense has been spared in gathering exhibits that will show the tremendous strides made by

the country in recent years.—The cleaning of London streets by night is carried on by motor cars which can carry great volumes of water and cover a large amount of territory.—The Mississippi a few days ago touched the highest point at New Orleans that it has reached for many decades, and the loss already occasioned to property runs into many millions.

THAT such a plunge could be taken by a locomotive in a river as that illustrated above without causing the death of either engineer or fireman is one of the near-miracles that occasionally happen in railroading.—The sight of Aguinaldo, the bitter foe of America twenty years ago but now a prosperous planter, on terms of

**T**HE path of the new Irish Free State has been strewn with thorns ever since its creation. The opposition of De Valera and his extreme Republican adherents to the Provisional Government has not abated in the least. As a matter of fact, the situation has been aggravated by his reckless pronouncement, in which he assured the youth of Ireland that the country was theirs for the taking and urged them to go ahead and take it. This has stimulated the mutinous spirit in the Irish Republican Army, which is now divided into hostile camps. Attempts have been made on the life of Michael Collins and his addresses have been interrupted by brawls and revolver shots. As regards Ulster, the outlook is a little more promising for peace owing to the agreement recently signed by Sir James Craig and Michael Collins at their conference in London.

## Miss du Pont, Universal Film Star, Shows Flexibility of the Arch

"The thing people don't seem to understand is that the foot is a cantilever spring so made that when it is allowed to function normally it carries the body with the greatest possible ease and resiliency."—Dr. Douglas Stewart, in *Physical Culture*.

Cantilever Shoes are so named because, though modishly designed, they are constructed upon the same principle as your foot.

Instead of being built with a stiff shank, reinforced by a strip of steel hidden away between soles, Cantilevers are fashioned with a *flexible arch*—the most important improvement in the making of modern shoes.

Instead of compelling your feet to fit them, they do the fitting. You lace them up to a glove fit under your arches; they furnish precisely the support needed there.

Instead of cramping every step,

that flexible arch agrees with every movement of yours. Hence the free and natural exercise of muscles, the prevention or correction of foot-strain, your escape from fatigue and more serious troubles, and that improvement in the circulation of your blood which adds to your vigor and to your appearance.

Many widths insure you an individual fit. Except in costly made-to-order shoes, how often have you had that? And in Cantilevers you secure your own personal fit in a model not only supremely comfortable, but good-looking.

If no dealer listed at the left is near you, write to the manufacturers, Morse & Burt Co., 11 Carlton Avenue, Brooklyn, N. Y., for the address of a near-by dealer and a copy of the Cantilever Shoe Booklet.
